This early warning warning system is the result of the collaboration between the public (dead bird collection), mosquito control districts, LSU Veterinary lab (bird,horse testing) Office of Public Health lab (human,horse testing), Federal USDA lab (horse testing), Parish Health Units and OPH Infectious Disease Epidemiology (Surveillance).

The system has worked in providing an early warning for the presence of WNV in parish before human cases appear and reducing the number of human cases.

Call (800)256-2748 for informa B# caseS of dead bird positive XXX Bird testing temporaril mosquito control. Continue JA=January, FE=February, MA Starting in May, the number fol

Anc=Anopheles crucian

Call (800)256-2748 for information

B# caseS of dead bird positive for West Nile Virus E# Horse caseS of West Nile Virus infection H# Human caseS of West Nile Virus encephalitis XXX Bird testing temporarily suspended since presence of WNV in the parish is well established. Early warning led to issuing alert to population and mosquito control. Continued testing would not provide any more useful information
